

2nd October 2020

Dear Parents/Guardians

Ellie, our wonderful school cook, has been wondering how to reduce packaging waste. Corona Virus restrictions mean we can no longer eat in the dining room, so we eat packed lunches. We produce a lot of waste every day doing this.

At last, she has found a brilliant way to deliver hot food to the school *and* reduce packaging. From Monday these boxes will be used to serve fresh, hot lunches to children:

These hot food lunch boxes are great. They are made from 100% natural products and are 100% recyclable.

Reasons to order hot food.

- ✓ Hot, freshly cooked food – perfect on a cold day!
- ✓ Compostable boxes made from 100% natural materials.
- ✓ Reduced packaging waste from packed lunches.

Reminder

Remember to order your hot school meals via the School Grid system over the weekend if your children would like to switch to something warming for lunch next week.

Kind regards
